

Event Type : Code Debugging

Event Name : DEBUGGERS ASSEMBLE

Event Flow

Round 1 (40 Minutes)

- No. of Questions: 30
- Participants must answer multiple-choice questions on output prediction, logical error identification, and debugging concepts.
- Each question carries equal marks.
- Teams are ranked based on their total score.
- In case of a tie, the team that completes the quiz in the shortest time will be ranked higher.
- The top 10 teams qualify for Round 2.

Tie-Breaker: Technical quiz (10 questions).

Round 2 (30 Minutes)

- No. of Questions: 4
- Questions consist of jumbled pseudocode with logical bugs and hindrances.
- Teams may solve the questions in C, Java, or Python.
- Teams must rearrange the pseudocode, fix the bugs, and execute the program successfully.
- Teams are ranked based on the total time taken to complete all questions.
- The top 5 teams qualify for Round 3.

Tie-Breaker: Logical Reasoning quiz (10 questions).

Round 3 (30 Minutes)

- No. of Questions: 1
- Participants will be given an intermediate-level programming problem to solve.
- Teams may choose C, Java, or Python to implement their solution.
- A hint related to the problem will be provided.
- Solutions will be evaluated using hidden test cases.
- Teams are ranked based on the number of test cases passed.

In case of a tie:

- Earlier accepted submission.
- Fewer submission attempts.

Event Guidelines

- This is a team event with 2 participants per team.
- There will be a 10-minute break between each round.
- Participants may use C, Java, or Python in the coding rounds.
- Any participant found engaging in unfair practices will be disqualified.
- The judges' decision will be final and binding.

Event Coordinators : Keerthivasan S , Selva Darshini S

Time : 10:15 - 12:30

Event Venue : A22
